What are the most important things that you learned in this course? Please reflect on the knowledge and skills you gained.

Comments
Theorems and proofs of fundamental calculus principles
Basics of analysis
math
Learning more advanced proofs, methods, and various mathematical concepts
A variety of topics, such as continuous functions, limits, derivatives, and compact sets.

Describe how aspects of this course (lectures, discussions, labs, assignments, etc.) contributed to your learning.

Comments
Lectures and office hours are very helpful
Leo's comments on proofs presented were super helpful.
class is students presenting theorems
Presentations were led mainly by students, though Prof intervened pretty often to give another explanation/answer questions

Comments
The professor and TA are always available for help, which made the class much less stressful
Hardest math class I've ever taken but super super worth it, very interesting.

I would recommend this course to:

	No	Yes
Highly-motivated and well-prepared students	14.29%	85.71%
Anyone interested in the topic	14.29%	85.71%

Thinking about your time in the class, what aspect of the instructor's teaching contributed most to your learning?

Comments
Office hours
Office hours and clarification on proofs from class
When he intervenes during a student presentation to give a better explanation or a visualization of a concept that might be hard to grasp.
In-class contributions, such as showing alternate ways to do a proof after a student presented or talking about the relation of concepts in the course to higher-level concepts. Additionally, I always found Professor Coregliano to be approachable and friendly, which helped to make him an excellent resource outside of class.

What could the instructor modify to help you learn more?

Comments
A little difficult, despite taking 16110 last quarter
Not much harder than IBL I.
know how to do proofs
Very difficult, but no real mathematical proof experience needed. Highly recommend to people with good problem-solving and interested in math
VERY HARD for anyone who comes out of high school with only Calculus knowledge. But its worth it trust me
It was more difficult than last quarter, but not unreasonably so.
