What are the most important things that you learned in this course? Please reflect on the knowledge and skills you gained.

Comments
proofs about functions, continuity, and derivatives
how to write proofs, delta epsilon, induction, continuity, functions, etc
Rigorous proofs that reformed by understanding in math.
We learned about delta–epsilon proofs, properties of real numbers, continuity, some of the core theorems of calculus, and derivatives and their implications.

Describe how aspects of this course (lectures, discussions, labs, assignments, etc.) contributed to your learning.

Comments
Most learning is done with psets. Most of class is proving theorems used on psets.
lectures were great to get to know more about proofs.
Practice during lectures and the free atmosphere in class.
The lectures were useful.

Please respond to the following:

Comments
difficult but I learned a lot.
My particular class was not very difficult but I heard that our section was the odd one out.

I would recommend this course to:

	No	Yes
Highly-motivated and well-prepared students	0.00%	100.00%
Anyone interested in the topic	20.00%	80.00%

Thinking about your time in the class, what aspect of the instructor's teaching contributed most to your learning?

Comments
Closer to the end of the course we started practicing more problems and examples in class which helped.
I liked how he explained the concepts.
His graphic explanantions of abstract proofs and ideas.
He gave thorough examples to illuminate the topic at hand.

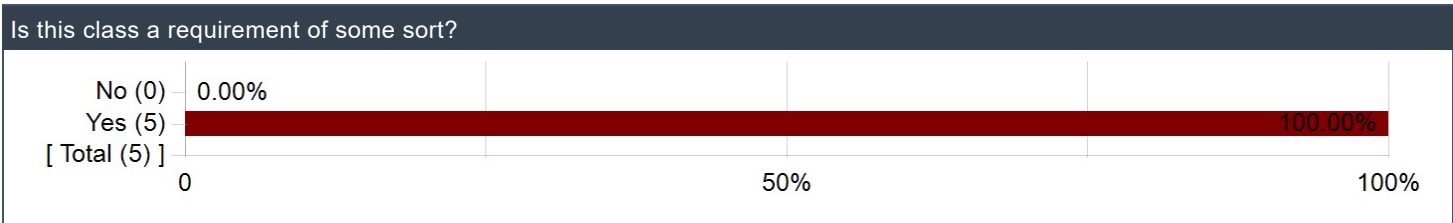

What could the instructor modify to help you learn more?

Comments
Maybe go through the proofs a but more slowly.
He was sometimes disorganized/ unprepared for the lectures. He also seemed unsure about what the expectations from students should be. Modifying these things would have helped me to learn more.

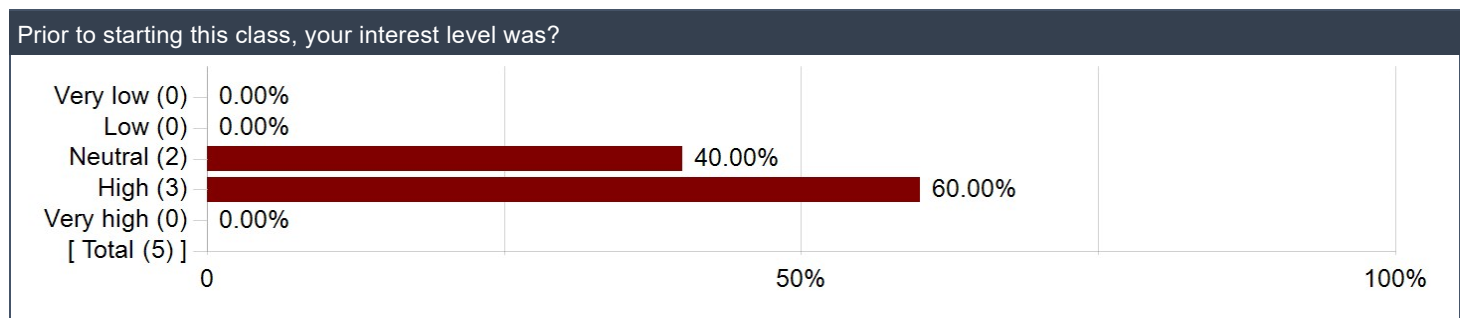

The Instructor . . .

Comments
I had never done proofs before but class was still manageable. Tobias was very fair about exams.
It was difficult but rewarding.
Very difficult but I enjoyed it
A comfortable difficulty, but certainly not easy.
It was not very difficult for me, however I came in with proof experience and some calculus knowledge. For someone without these things it might be much harder.
