**What are the most important things that you learned in this course? Please reflect on the knowledge and skills you gained.**

Comments
Fabrication with wood + paper, how to film in a confined environment, creativity process in filming.
Video making, lighting, and texture.
How to think and act on space and time.
I learned some technical camera and video editing techniques, as well as how to constructively critique artwork and view art through different lenses.

**Describe how aspects of this course (lectures, discussions, labs, assignments, etc.) contributed to your learning.**

Comments
The readings didn't really help much, but the screenings and critiques did help me to understand Catilin's expectations and also how to improve my works weekly. Looking at others' works really helps to see the advantages and weaknesses in my own work.
Was able to play around and explore different media besides drawing/painting.
All the class periods and assignments were interesting and valuable for my learning.
Through the different video assignments I learned how to think outside of the box and was forced to be creative because the prompts didn't always offer a lot to go off of which allowed you to do a lot of different, sometimes unconventional, things.

## Thinking about your time in the class, what aspect of the instructor's teaching contributed most to your learning?

Comments
I think both the demos and critiques really helped my learning. The demos helps us to understand and learn the skills that we can apply in our projects.
Artist screening and group critique.
I liked the demonstrations as well as the screenings.
I enjoyed the screenings of different artist's works and thought the technical demos in premiere were very helpful.

## What could the instructor modify to help you learn more?

Comments
It would be better if she can give us grades so that we know what level we are on and how we should improve on future assignments, to better grasp the expectations of the assignments.
At times I felt unsure on what the guidelines for our assignments were/what was expected of us. It might be helpful at the beginning of class to see examples of what our work could look like. But, I also I feel like not having much to base our work on allowed us to be creative and take our videos in a lot of different directions.

Comments
Great for beginners.
Not difficult, you get out of the class what you put in.
I had no experience with cameras and video editing and this course wasn't technically challenging at all. Caitlyn explained how to use the cameras and edit our videos well, so I was able to learn pretty quickly.
