## The learning objectives of the course were clear and I understood how to achieve them.

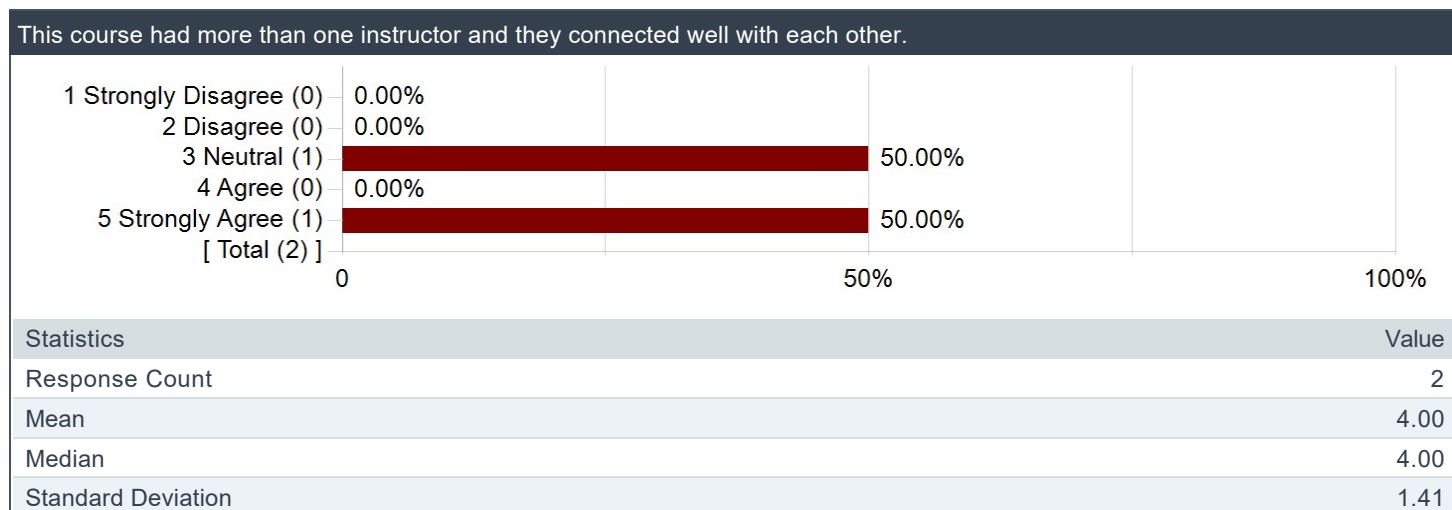

## The course helped me to make important progress toward the stated objectives.

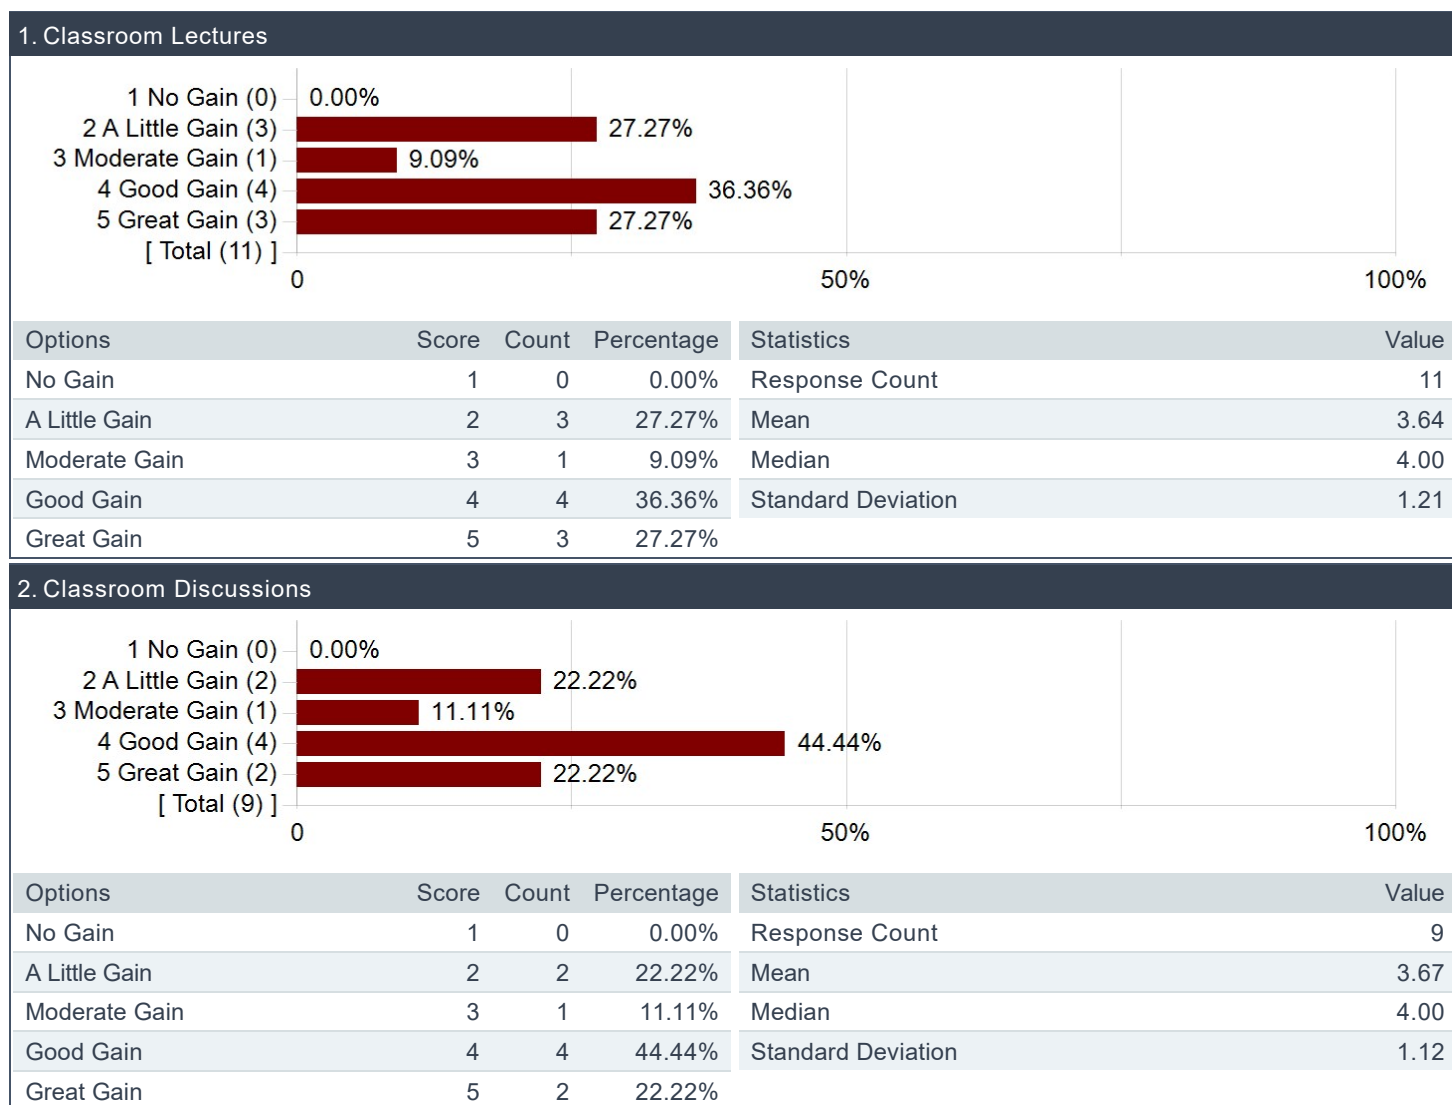

## The graded elements of the course were directed toward assessing my progress toward the stated course objectives.

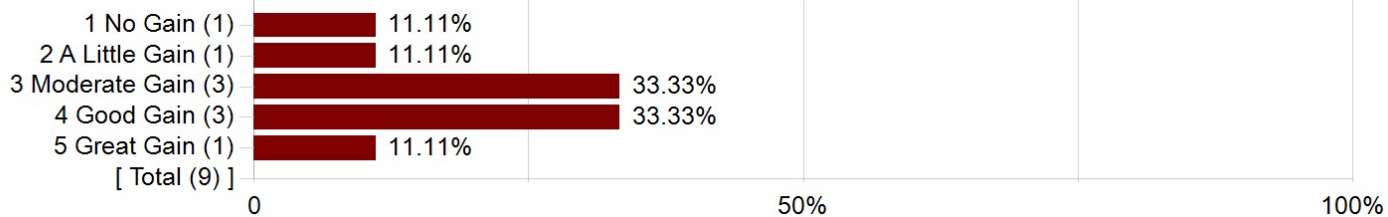

## This course had more than one instructor and they connected well with each other.

## How much did the following elements of the course contribute to your learning gains?

### 10. Teaching Assistant Office Hours

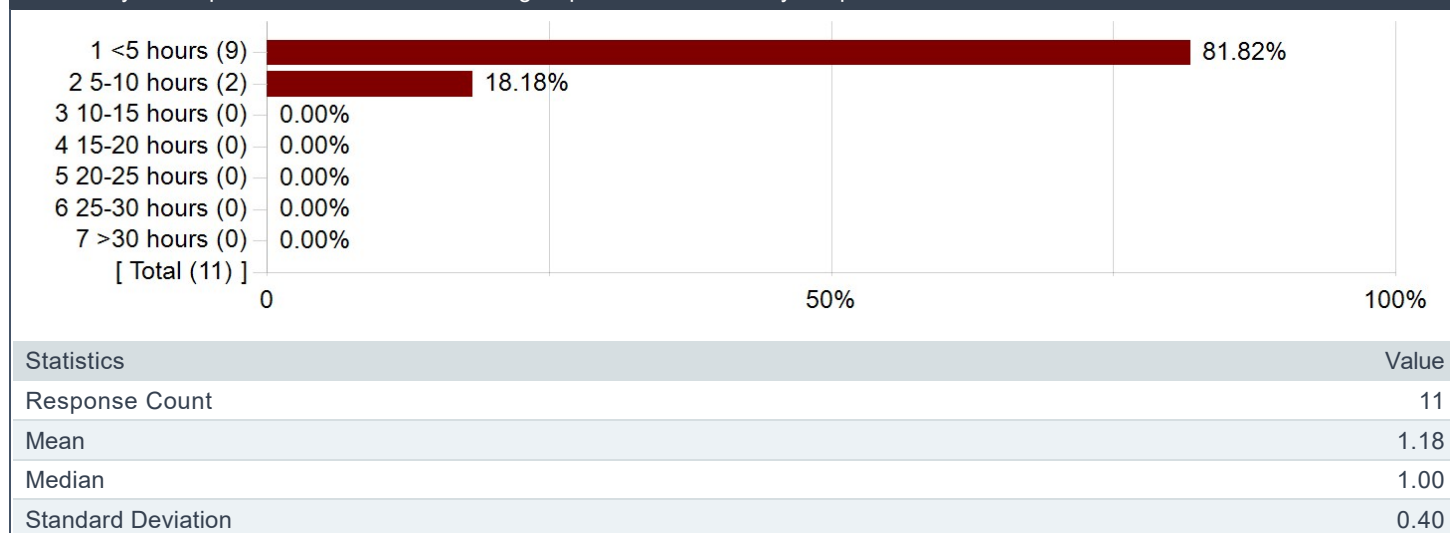

## What was the most important thing (to you) that you learned in this course? What aspect of the material is still unclear for you, that you wish you could have learned better?

### Comments

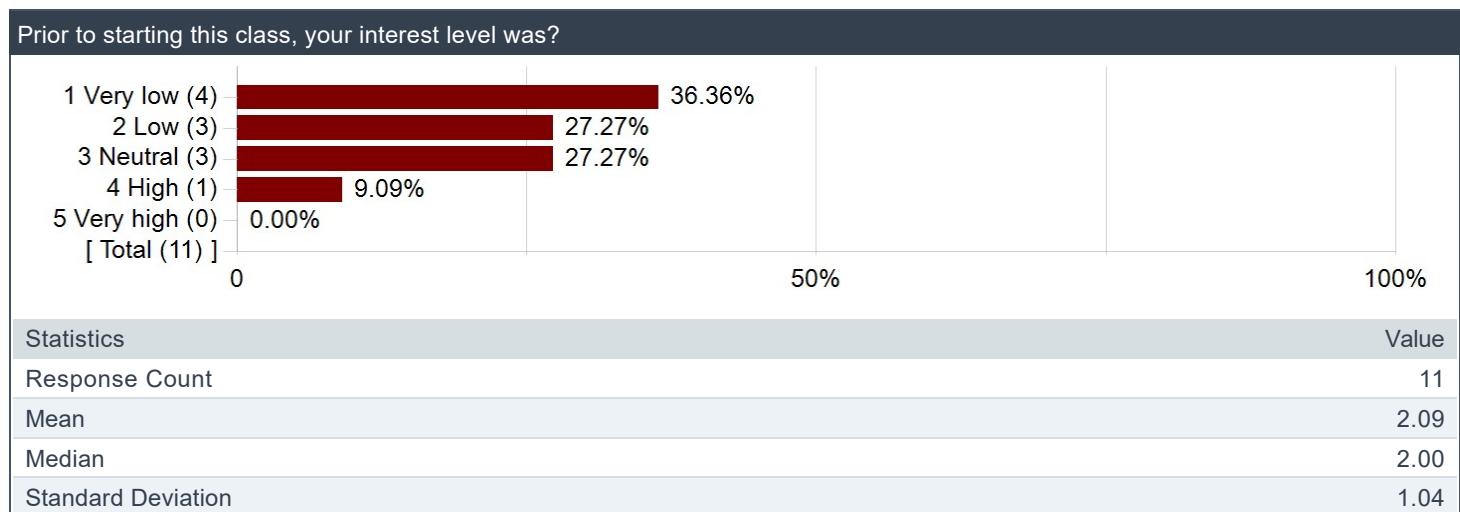

How organisms are able to regenerate. We focused a lot on the cell system and the central dogma of biology. I'm just bad with science so I would say that I'm still kind of lost in every unit but that's me than the class.

## How many hours per week outside of attending required sessions did you spend on this course?

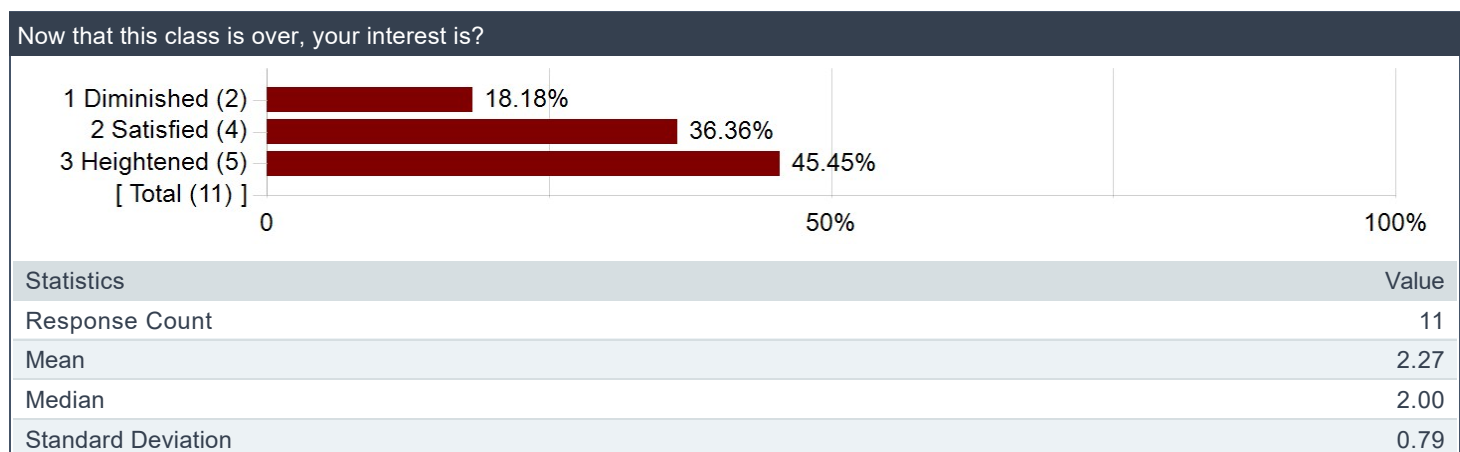

### How many hours per week outside of attending required sessions did you spend on this course?

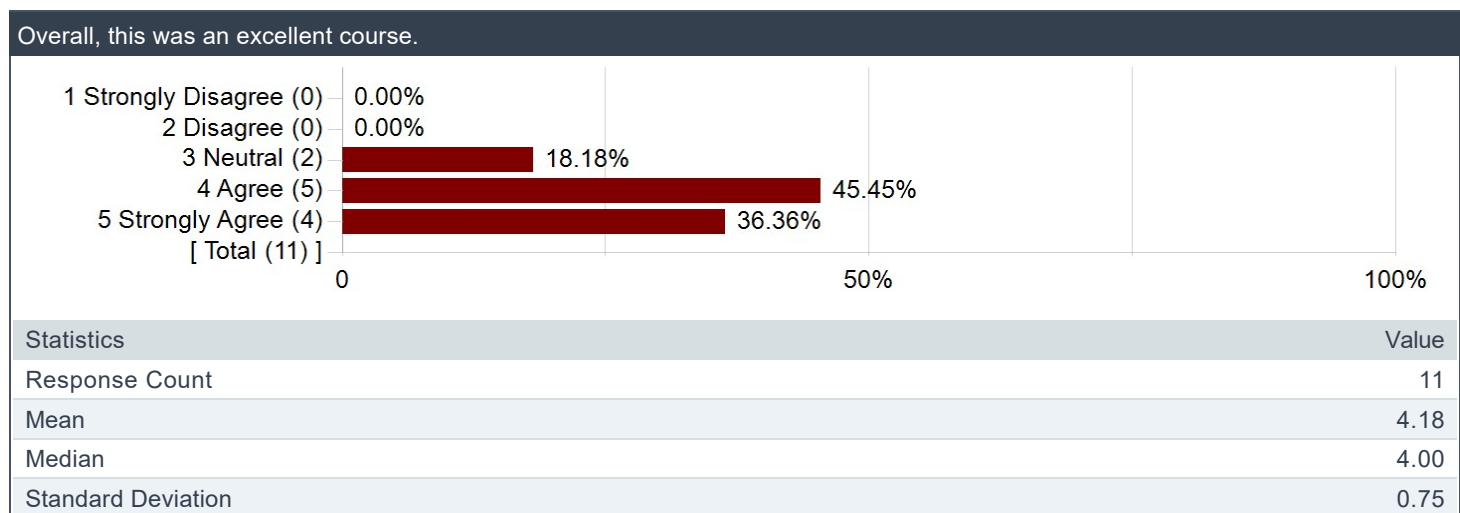

## Prior to starting this class, your interest level was?

## Now that this class is over, your interest is?

## Overall, this was an excellent course.

## Please share any advice you have for students who are considering taking the course.

Comments
GO TO CLASS! You usually get out early anyway so just go because the lectures are necessary for the quizzes and the labs are actually cool. Dr. Brock is also really funny so she makes class enjoyable.
None here
I had a slight background in bio, but even without it this class would have also been fine
