**What are the most important things that you learned in this course? Please reflect on the knowledge and skills you gained.**

Comments
We learned the limit definition of integrals, how to compute various integrals, and how to prove the convergence of sequences.
Calculus
Construction of integrals using partitions, fundamental theorem of calculus, proofs for irrationality of pi and e, taylor polynomials and residuals, infinite sequences and series.

**Describe how aspects of this course (lectures, discussions, labs, assignments, etc.) contributed to your learning.**

Comments
Lectures provided examples of the material.
Great lectures on important topics in calculus 2.
The lectures were lively and rigorous at the same time, and we were able to full engage in the content,

Comments
He gave many examples that illustrated the topics at hand well.
His review of the course textbook in lectures to make its contents clearer and more 'understandable.'
The instructor's comments about simple ways to understand the proofs are very helpful. He does a good job in building an intuition of proofs, and connecting pictures to formulas.

## What could the instructor modify to help you learn more?

Comments
N/A
It may be useful to go over certain problems in problem sets in class? It depends whether there is time, though.

Not very difficult
I think it was a hard course but it challenged me in a good way.
Pretty difficult relative to having no math background at uchicgao.
Inspiring and challenging, but not unendurable at all.
