I learned about how to write analytic essays much better, and I feel like my skills progressed greatly over the course of the sequence. I also learned how to do research using psychological journals, and writing a literature review!
A general and useful understanding of the functionings of the mind
Learned about a lot of cognitive and psychological subjects. That being said, the most important thing I learned was how to properly digest long research articles to understand their key takeaways. I would say this aspect of the course is the most beneficial.
I learned how to digest articles and synthesize them effectively. Also learned how to express my findings and extrapolate ideas and share them with others.
I learned how to self advocate, contribute to thoughtful discussions, hone my writing skills, and be a more open-minded student. This course taught self-discipline and was highly revealing regarding the inner workings of the human mind.
Learned about the self and how it changes between context. Learned how to formulate questions and find research that responds to those questions.

Describe how aspects of this course (lectures, discussions, labs, assignments, etc.) contributed to your learning.

Discussions were a great way for me to reflect on the week's readings and lecture, and it also helped me to think critically about the meaning of the studies as well as what they meant for the theories we discussed.
once a week lecture, a written response to lecture and writing and a small discussion section once a week as well
Discussions are very thought provoking and you will get a lot out of them if you participate. Professor Henly's assignments are more challenging than what I have heard of from other profs, but will allow you to become a much better analytical thinker and writer as well.
The discussions were very helpful in understanding the lecture information. Talking about the quizzes with other people was also very helpful
Discussions were a wonderful compliment to lecture
Lectures helped with learning the concepts and basics of this course. Discussions were great for working out ideas.

It definitely challenges you, but as a result you grow tremendously over the course of the sequence!
wonderful professor – has helped me become a better writer more than any other professor here
Professor Henley is definitely a tougher class, especially within Mind. However, it is very rewarding. You actually learn how to improve your writing and your synthesizing of information.
Anne Henly is the best professor for this course. She expects a lot from her students, and in turn gives a lot. Her lectures were absolutely riveting this year
Professor Henley was a great teacher. She was very good at facilitating instruction and giving adequate feedback on assignments. Even though her class is more work compared to some of the others, you will actually learn something and get a lot out of it.

I would recommend this course to:

	No	Yes
Highly-motivated and well-prepared students	0.00%	100.00%
Anyone interested in the topic	14.29%	85.71%

Thinking about your time in the class, what aspect of the instructor's teaching contributed most to your learning?

Comments
Professor Henly was amazing at guiding discussions and helping all of us to think deeply about the week's topics, and I feel that she was instrumental in my personal growth throughout the quarter!
conversational teaching style and respect of her students
Professor Henly was always willing to meet one on one to answer questions about lecture topics or writing concerns that ant students may have had. Her guidance very much helped me succeed in this class.
Discussion she does a great job explaining and helping everyone understand the information
Her warmth, openness, and expertise in this field of work were the biggest factors in contributing to my learning during discussions
She was great at taking ideas that students had and helping to flesh them out. She also gave great feedback on assignments

What could the instructor modify to help you learn more?

Comments
Nothing that I can think of! The class was always well planned and there was never a day that I feel i didn't learn anything new!
not much – maybe have people put away laptops afte say the first 15 minutes of class
Allow us to submit the discussion posts after discussion. That way we can use the info from discussion in our graded work. Also allow us to see our grades on canvas so we can see how we're doing, especially weekly class participation
no pop quizzes
nothing much. she was great!

It was my first time taking a socs class, and I had taken hum the year before, and it was definitely difficult at first, but it was so worth it because as I learned how to write papers in the socs style, I feel that I truly began to learn and grow as a writer! The payoff is worth it, and I would most definitely recommend Professor Anne Henly to anyone who is interested in taking the Mind Socs sequence!
this class is very difficult monday to wednesday and very mellow for the rest of the week – plan accordingly
Henly is definitely the most difficult mind instructor. that being said, very nice person and I certainly learned because of her.
This course with Professor Henly is more difficult than other sections, but will make you a much better analytical thinker and writer.
Henly is difficult, but not because of background.
You must be dedicated and have a hardworking mindset. You will grow a great deal in this class
not very difficult. The assignments actually require you to think, but if you put in just a little bit of effort and time, they are not bad
